

APPRENTICE SYSTEM OPERATOR – 3RD YEAR

DUTIES & RESPONSIBILITIES

This position reports directly to the Manager, Systems Operations and is responsible for:

- Controlling all operation systems, as well as, authorizing the operation of system devices and equipment and control access to electrical plant and substations.
- Providing work protection to employees and authorized contractor(s) working on the distribution system in accordance with EUSA and the Company's Work Protection Code.
- Reviewing system loading, equipment loading and voltage drop at various supply points and recommending corrective measures as required.
- Evaluating load transfer capabilities to cater to seasonal variation in load pattern and if required for speedy power restoration purposes.
- Dealing with all power interruptions and emergencies and dispatch staff to effective corrective measures for isolation, emergency repairs and restoration purposes.
- The Control Room is staffed 24 hrs a day, the successful candidate will be required to work on a shift rotation based on a 40 hour work week.
- The successful candidate will be required to enroll and work towards the completion of the EDA System Operator certification program by satisfying the hours and the training requirements for this designation. As the individual's skill level improves and upon acquisition of the certification, he/she will be expected to fulfill all the requirements of the System Operator position.

QUALIFICATIONS

- Graduate from an accredited institute in Electrical/Electronics Technology or OACETT Certified.
- Minimum 3 years experience in a control centre and qualified in the EUSA utility work protection code.
- Successful completion of 2nd year MEARIE operator training programme.
- PC experience and knowledge of SCADA, GIS and OMS packages is highly desirable.
- Consideration will also be given to qualified System Control Operators and to Apprentices who have less experience.
